📅 1 Year 9 Months

## 1. Strong and Concise:

React JS Developer (Redux Toolkit) | 1 Year 9 Months Exp

## 2. Action-Oriented:

Building High-Performance Web Apps | React JS Developer with Redux Toolkit (1Y 9M Exp)

## Profile Summary

Highly motivated developer with a strong background in web and mobile development. Skilled in React JS, React Native, TypeScript, JavaScript, and well-versed in backend technologies like Express, and MongoDB. Eager to contribute to a challenging role and continuously learn within a dynamic environment.

## Education

2022, Full Time

**MCA, Dr. Babasaheb Ambedkar Marathwada University, 8.42/10**

2019, Full Time

**B.Sc, Babasaheb Ambedkar Marathwada University (BAMU), Aurangabad, 54.53%**

2016

**12th, Maharashtra, English, 55-59.9%**

2014

**10th, Maharashtra, English, 70-74.9%**

## Work Experience

2022 - Present

Associate Software Engineer

**Opcito Technologies**

As a Software Developer Associate at Opcito, I am responsible for developing front-end features for Projects using React JS, Redux toolkit, Sass, and BootStrap. I am also responsible for implementing RBAC (role-based access control) for the project.

In this role, I have gained hands-on experience in front-end development using popular JavaScript frameworks and libraries. I have also learned how to implement security measures like RBAC to ensure that the project is secure and accessible only to authorized users.

**My responsibilities include:**

1. Developing front-end features for the Projects using React JS, Redux toolkit, Sass, and Bootstrap
2. Implementing RBAC (role-based access control) for the project to ensure that it is secure and accessible only to authorized users
3. Collaborating with other developers and stakeholders to understand project requirements and deliver high-quality code
4. Participating in code reviews to ensure that code is maintainable and scalable
5. Keeping up-to-date with the latest web development trends and technologies

Overall, my role as a Associate Software Developer at Opcito has provided me with valuable experience in front-end development and security implementation. I am excited to continue learning and contributing to the success of the projects at Opcito.

2022 - 2022

Trainee Software Engineer

### **CognitQ**

- MERN Stack Developer (Training) (Duration)
- Successfully completed a comprehensive training program in MERN stack technologies (MongoDB, Express.js, React.js, and Node.js).
- City Guide Project (Learning Project)
- Leveraged newly acquired MERN stack skills to develop a user-friendly travel platform.
- The platform aggregated essential travel information including top hotels, tourist spots, hospitals, petrol stations, and police stations, offering a one-stop solution for trip planning.
- Contributed to building an intuitive user interface for seamless navigation and information access.

## **Projects**

16 Months

### **Resource Hub**

Created a centralized repository for business information with user role-based permissions, enhancing resource management and access control.

Built front-end features with React JS, Redux toolkit, Sass, useFormik, and Bootstrap, and integrated role-based access control (RBAC) using Git and GitHub for version control.

1 Months

### **City Guide**

Created a user-friendly travel platform, offering essential details on top hotels, tourist spots, and the locations of hospitals, petrol stations, and police stations, simplifying trip planning for travelers.

Developed front-end features using Bootstrap, React JS, and Redux toolkit Developed REST APIs using Django and Express Used Git and GitHub for version control

3 Weeks

### **Coupons App**

Coupons App for Internal use of company

Created the "Coupons App" to simplify employee meal coupon management and automate monthly billing. As the lead backend developer, utilized Express.js and MongoDB to build the system and essential APIs. Automated the billing process, introduced a user-friendly meal booking system, and facilitated expense tracking for employees.

2 Weeks

### **Notes**

The "Notes" project was a web application aimed at learning React with TypeScript and Redux Toolkit for state management. It provided hands-on experience in modern web development.

## Key Skills

React

React Native

Javascript

TypeScript

SQL
